Content Filter Configuration Change Request

The District provides Content Filtering to help keep offensive material from entering your agency via the Internet. Because we are committed to the filtering, the system is set up so that the filter is not bypassable. However, we realize that there are exceptions to any circumstance and in the case of the Internet we do not support blocking access to a site that should not be blocked.

To that end, if you determine that a site should be blocked or unblocked, please fill out the following form and submit it to the District Information Security Program. Your request will be reviewed and a response will be provided within five working days.
